

The Pest Control Association of Nigeria (PECAN) is a coalition of professional organizations certified by the Environmental Health Council of Nigeria (EHCON). It was founded to uphold ethical standards, promote best practices, and safeguard the welfare and professional growth of its registered members. PECAN plays a leading role in combating disease vectors and eliminating quackery in pest control services across Nigeria.

PECAN strongly advises individuals and corporate entities to engage only registered and licensed practitioners. Hiring unqualified providers can result in significant safety risks, legal consequences, and potential closure of business premises.

“Listed below are certified PECAN members who have met all Professional criteria to practice in the current year”
